

Together We Win
MaryBe McMillan

Across the nation, workers are winning,
And this is just the beginning.
See the power of action that's worker-led,
Watch as coast to coast, strikes spread.

Working folks are woke.
For too long, too many of us broke.
Our economic policy a joke.
We are ready for change,
To organize, mobilize, engage.

Tired of the lawmakers turned promise breakers.
Either stand for what's right or get ready for a fight.
We the People want a real choice,
An independent political voice.

And no more defense, talking about all we're against.
It's time to inspire, to set the world on fire,
With the vision of all that can be.
Justice and prosperity for you and me,
Universal health care, wages that are fair,
Tuition-free education, better lives for the next generation,
Taking care of the least of these, not the bankers & the Wall St thieves,
A world where Black Lives truly matter
 And the glass ceiling has long shattered.

All of this is within our grasp,
When the walls that divide us collapse.
Together we are unstoppable, all things possible.
In our hands the power to win.
I say together we win, you say count me in.

Together we win! (*Audience Responds*) Count me in!
